1. Write a program to check whether the addition result is divisible by 10.

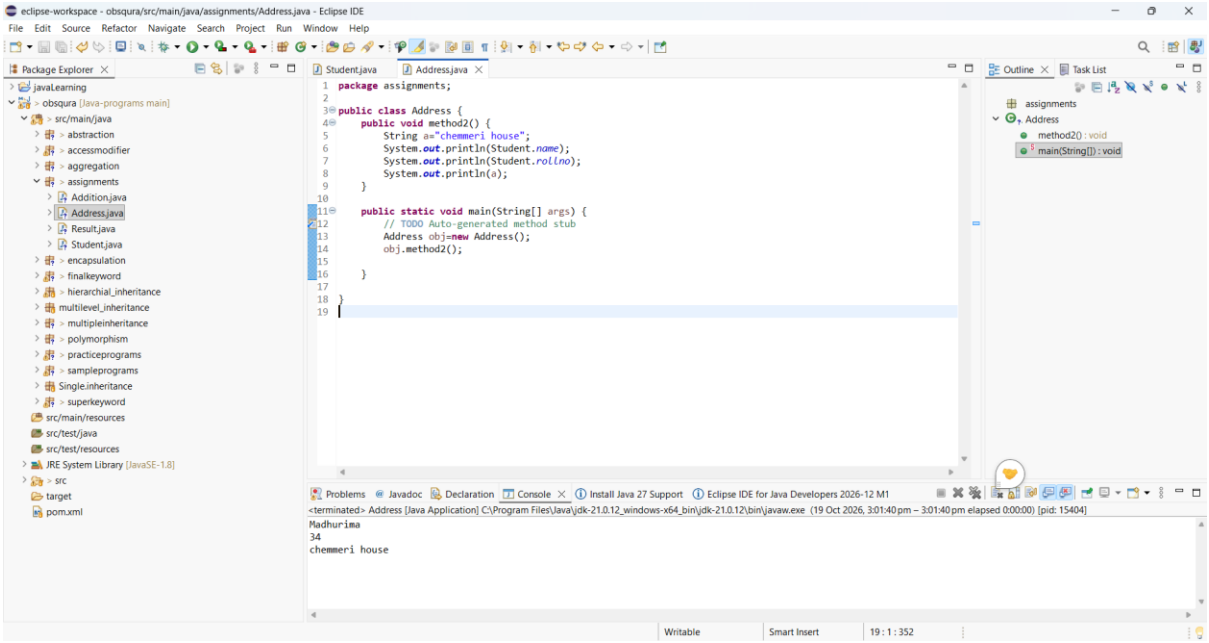

- Class 1: Return the addition result of two numbers.
- Class 2: Check whether the addition result is divisible by 10 using the super keyword.

2. Write a program to get the details of a student.
   Class 1: Student — Get the student name and roll number.
   Class 2: Address — Get the address of the student.
   Print the student name, roll number, and address. There is no IS-A relationship.
